-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Specification*

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification fails to provide antecedent basis for the electronic circuitry.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5 and 72-80 are rejected under 35 U.S.C. 102(b) as being anticipated by Dey et al. (DE 15910710 A1). Dey et al. teaches an apparatus for conditioning gas comprising a housing, a heating element a humidity sensor, a heating element, electronic circuitry connected to the humidity sensor adapted to generate an audio or visual recharge signal as a result of the humidity level detected. He teaches a backup container and temperature sensor. Please note the operation of this device is to further signal with an alarm when the humidity drops below a certain level.

4. Claims 1 and 75-80 are rejected under 35 U.S.C. 102(e) as being anticipated by Garrison et al. (5,849,005). Garrison et al. teaches an apparatus for conditioning gas comprising a

housing, a humidity sensor, heating element, a trocar, electronic circuitry connected to the humidity sensor adapted to generate an audio or visual recharge signal as a result of the humidity level detected and a temperature sensor. Similarly, the operation of this device is to further signal with an alarm when the humidity drops below a certain level.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 2-5, 72-74, and 81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garrison et al. ('005) in view of Dittmar et al. (4,825,863) or Dey et al. (DE 15910710 A1). Garrison et al. teaches all of the limitations of the claims except for explicitly reciting a backup container and liquid retaining layers. Dittmar et al. and Dey et al. teach both teach backup containers and liquid retaining layers. In the least, both Dey et al and Dittmar et al. both teach a backup container and Dittmar et al. further teaches a liquid absorbable member. It would have

been obvious to one of ordinary skill in the art to modify Garrison et al. with a backup container to maintain a supply of liquid and a liquid absorbable member to help aerosolize and humidify the air for the purpose of maintaining humidification and providing a medium to add humidity within the device and to the local environment as is well known in the art of humidification.

***Response to Arguments***

8. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection necessitated by amendment and request for reconsideration.
